

EP-LU10011 EUROspiro SP-11 WIRELESS SPIROMETER

NB product is subject to change without notice.

Description

EUROSPIRO SP-11 is the new solution for spirometry according to BTPS. It features A Bluetooth interface, disposable turbine, and a color display.

EUROSPIRO SP-11 Supports forced, relaxed and MVV vital capacity measurements. 3 measurement modes. Supports real-time monitoring of device connection and correction of body temperature and saturated pressure (BTPS). Supports flow-volume curve (volume velocity loop) and volume-time curve (vital capacity-time curve). Detects up to 50 analysis parameters such as FVC, PEF, FEV1, FEV1/FVC, FEV6 lung age, etc. Supports detection, automatic diagnosis and end of exhalation.

EUROspiro SP-11 is compatible with
BOFAP[®]
The only cardboard AVB Filter !
Designed, patented and manufactured by LUMED[®]

All registered trademarks are the property of their respective owners.

Technical Features																																																									
Manufacturer, Model	Beneware SP-11																																																								
Transducer	Turbina digitale bidirezionale, up to 300 tests																																																								
Temperature Sensor	Semiconductor, 0°-45°C																																																								
Volumes	0 to 10 litres, accuracy ±3% or 50 ml																																																								
Flows	-16 to 16 liters/ses, accur accuracy atezza ± 5% or 200 ml/s																																																								
BTPS	Automatic BTPS correction is included (Body Temperature and Pressure Saturated)																																																								
Resistance at 12 l/s	< 0.5 cmH ₂ O/l/s																																																								
Predicted Values	GLI, ECCS, Austrian-Forche, Multicentrico de Barcelona, Polgar 71 e 79, Morris, Austrian Reference Values, Crapo, Cherniak, Knudson, Ulmer, Baur, Hankinson (Caucasian/Asiatic, Afro-American, Latin American), Schindl, Zapletal, Zhejiang, Chinese																																																								
Acceptance Criteria	ATS, ERS, BTS																																																								
Interpretative Models	ATS/ERS 2005, NICE 2010, ARTP
